Vital Statistics Screen

SUMMARY

The Vital Statistics Screen is the main screen for LMSGold for Windows. The user can tell at a glance what is happening in vital areas of the program and the business. The screen refreshes automatically at set time intervals. Some fields integrate with the Security and Multi-user Module, and accessibility for viewing can be restricted.

VITAL STATISTICS SCREEN

1. The **Reservations Summary** contains total columns for **Yesterday**, **Today** and **Tomorrow**. The totals are available for **Rides Booked**, **Rides Cancelled**, **Rides to Be Scheduled**, **Rides in Progress**, and **Rides Completed**.
2. **User** indicates the user name that is logged into the system on that workstation.
3. **Rides Booked** and **Rides Cancelled** totals for yesterday, today and tomorrow are also tracked.
4. The **Account Summary** section contains accounting information up to the previous day. The totals for **Invoices to Post**, **Total A/R**, **Current**, **30 Days**, **60 Days**, and **90 Days+** is available and can be blocked from viewing in the Security module.
5. The date of the **Last Backup** is also available. LMSGold has a backup feature of the master data base file within the program to the hard drive. This feature is not meant to replace an additional source for backing up such as an Iomega Zip Drive or a CD backup. This is not an alternative for regular (daily is recommended) backups of the entire program to an external backup device.
LMS does not take responsibility for the failure to do regular backups of the entire program to an external device.
6. **Users Logged In** indicates the number of users logged into LMSGold for Windows.
